

Summary to Comprehensive Website Analysis

The subject website exhibits a mix of commendable features and areas requiring improvement. This analysis delves into both the positive aspects and the challenges encountered during the review process.

(Navbar) changes:

1. Add a search bar (For services content).
2. Remove link for (Our partners) page (the content of “Our partners” will be moved to other pages as follows in the descriptions below)
3. Display the name of the chosen language (Arabic / English and not the word “Language”).
4. Change (About the company) -> (About us).
5. The navbar should be responsive and to keep the same design style for the links in Desktop and mobile.

(Footer) changes:

1. Remove gallery from the footer (will be added in another page)
2. Remove captcha link from the bottom right of the screen
3. Make the (Scroll to top) button smaller
4. Change the newsletter subscription to be 100% width and more visible in terms of input colors.

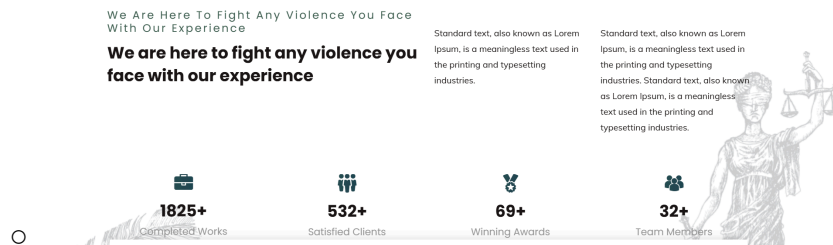

(Home) page changes:

1. Hero section:

- Logo.
- Description.
- Add (call to action) button
 - i. (Discover how we can elevate your business !)

2. We are here to fight any violence you face with our experience:

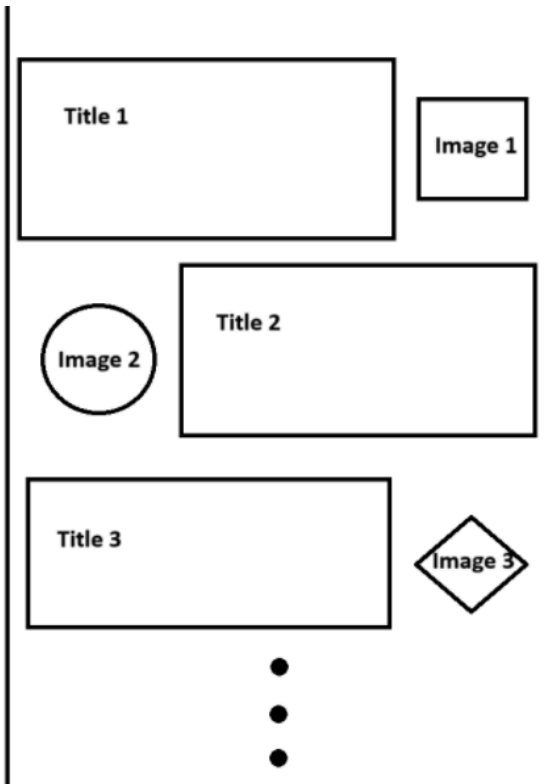

- The section should display numbers about our successful work

- 3. Years of experience (with a better title).
- 4. Our services.
- 5. Our partners (a Slider with partner names)
- 6. Our team (A slider with the names of our best employees)
- 7. Contact us form
- 8. Newsletter subscription

(About us) page changes:

1. Our story.
2. Firm values as the following shape (Card and image for each value from A -> F)
3. Firm Objectives as the following shape (Card and image for each value from A -> F)

- 4.
5. Our team (A slider with the names and images of our best employees)

(Recommendations) page changes:

1. A word from our CEOs (cards with quotes)
2. Testimonials cards (Slider or grid)

When it comes to backlink analysis, Ahrefs is my #1 go-to tool. I've tested over 25 link analysis tools and none comes close to Ahrefs in terms of index size, freshness and overall usability. If you're serious about SEO, you need Ahrefs.

Brian Dean
founder of [Backlinko](#)

As part of our job at Authority Hacker, we test every SEO tool out there to try and determine which is the best. Because Ahrefs comes ahead in 99% of the cases, some of our readers are starting to call us biased. Please stop being good at everything, it's hurting our reputation.

Gael Breton
co-founder of [AuthorityHacker](#)

Ahrefs is a great tool. The data is fresh, the usability is fantastic and you guys keep adding great new features to the platform.

Aaron Wall
founder of [Seobook](#)

At Outspoken Media, we rely on Ahrefs daily to help us achieve great results for our clients. What makes Ahrefs invaluable to us are its intuitive design, reliable data, and innovative features. Ahrefs is a must-have for serious digital marketers and SEOs.

Rhea Drysdale
CEO at [Outspoken Media](#)

What I love about Ahrefs is their commitment to speed, design and innovation. The data is fresh, relevant, and granular enough to allow us to make very actionable decisions. I love that they've made significant moves to continually innovate and add new features. Not only do they make us stronger as an agency, but they've kept the entire SEO software industry on its toes.

Michael King
founder of [iPullRank](#)

We use Ahrefs mainly for its site explorer, and it's immensely improved how we find link targets. We use it both for getting quick analysis of a site, as well as utilizing its extensive index when we want to dive deep. It's invaluable to have one tool that can do both of those things.

Jon Cooper
founder of [Hyperlynx Media](#)

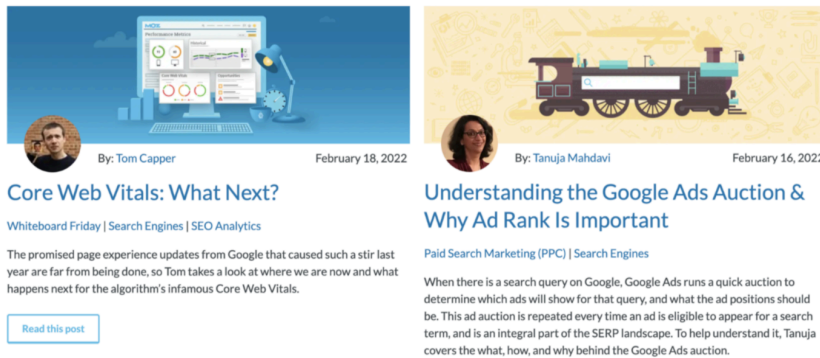

3.

(Our services) page changes:

1. Add a services listing page
2. List different services into cards and each card when clicked can view the service description.

(Blogs) page changes:

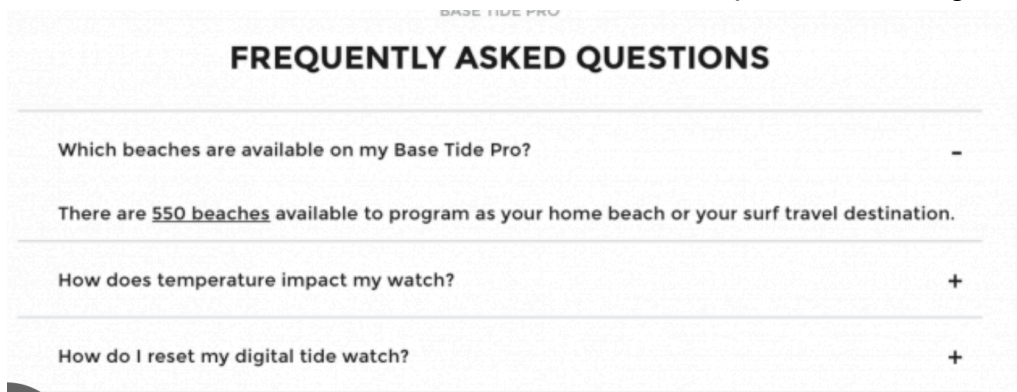

1. Display blogs as cards with images and a (read more) button (example below).

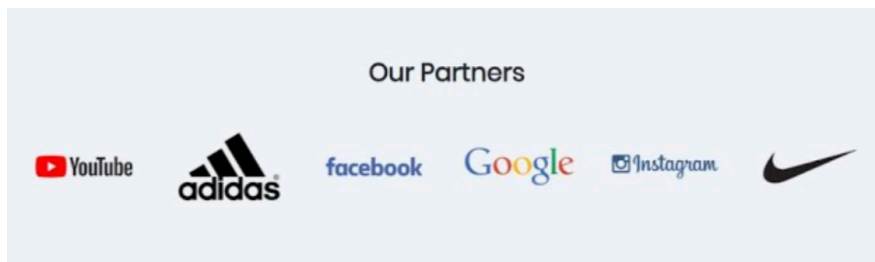

- 2.
3. Keep the blogs updated with the same provided data in the previous design
4. Add our gallery section here (instead of the footer gallery)

(Contact) page changes:

1. Contact us form (and / or Join our team form)
2. FAQs section to be added after the contact form as per the following example

- 3.
4. Our partners section (As a horizontal slider with partners names and logos) as the following example

- 5.
